**CuttingStation™ Clamp SS7C**

- ⚠ The universal clamp holds electric saws in place while being used, to improve H&S best practices
- ⚠ A variety of chopsaws and mitre saws can be fitted to the CuttingStation using the clamp
- ⚠ The clamp features a universal design intended to fit almost any saw, with fixing holes ranging from 110mm – 600mm, and depths ranging from 30mm to 475mm
- ⚠ 2 different lengths of bolts are included as standard
- ⚠ Designed to be simple to retro fit to any existing SS7
- ⚠ Very low profile clamp only adds 30mm to the worksurface height
- ⚠ Where repetitive cutting is required, the clamp prevents the saw and frame shifting out of position, resulting in consistent, precise cuts.
